Note:
View photomontage flat at a comfortable arm's length. If viewing the photomontage on a screen, enlarge it to full screen height.
A photomontage can never show exactly what the wind farm will look like in reality due to factors such as: different lighting, weather and seasonal conditions which vary through time and the resolution of the image. The images provided give a reasonable impression of the scale of the turbines and the distance to the turbines, but can never be 100% accurate. A static image cannot convey turbine movement, or flicker or reflection from the sun on the turbine blades as they move.
