KEY:

- Proposed wind turbine

LVIA Study Area

10km buffer rings

Viewpoint

Zone of Theoretical Visibility - Blade Tip

Blade tips theoretically visible

Hubs and blade tips theoretically visible

This drawing is based on a computer-generated Zone of Theoretical Visibility (ZTV). The areas shown indicate the maximum theoretical visibility of the proposed turbines using OS Terrain 5 and 50 data and do not take account of any screening from vegetation or built-form. The ZTV also includes an adjustment that allows for the Curvature and Light Refraction of the Earth.
